Mr. Arvind Subramaniam, Advocate

Appeal for Founder Donorship

Dear

I thank you for all your support and encouragement you have given in my endeavour to give **Comprehensive Lifetime Free Medicare** to over 650 young Insulin Dependant Diabetics, receiving this free service at the VHS Diabetes Department for the past 41 years. Due to the generosity of Mr.R.T.Chari, M.D., Tag Corporation, Chennai, and the foresight of the President Padma Vibushan Dr.M.S. Swaminathan and the Members of the Central committee of the Voluntary health Services Trust, We have now been sanctioned permission to establish the unique **TAG VHS Diabetes Research Centre** – (as a unit of the VHS Diabetes Department) – in the already existing building in VHS Campus.

I am writing this to personally request you to support this venture of a world class and futuristic research effort, to provide inclusive health and wellness to all economic segments in the community, which was the dream and pioneering effort of our founder Dr.K.S. Sanjivi.

We would be greatly honoured if you would agree to become a Founder Donor of the **TAG-VHS Diabetes Research Centre**. For this, we request you to give a donation of total of Rs 50 lakhs either as a single donation or split into 2 instalments of Rs 25 lakhs this year (2009) and again a similar amount next year (2010). We have reserved eight Founder Donor slots (as shown in this model letter head) for our regular donors like you, to help us build up a Corpus for Research.

As you are already aware the full amount of the donation to Voluntary Health Services is exempt under Section 35(i)(ii) of the Income Tax Act (120%)and due receipt and exemption certificate will be issued in the name you desire.

As a gesture of thanks-giving to your generosity, we have undertaken to offer **complete lifetime free medical services (at our department and TAG-VHS Diabetes Research Centre) to all the Founder Donors (in the special deluxe category)** and two of their nominees (in the general free category). I do hope you will appreciate this gesture and avail of the offer.

The Mission Statement and our planned Research programme are enclosed for your perusal and comment.

I am looking forward for your continuous, sustained support of our efforts to serve the Community in the Field of Innovative Human Healing.

With regards,

Yours sincerely,

DR.C.V.KRISHNASWAMI)
FRCP (E) DTM & H (EDIN) FAMS
HEAD OF THE DIABETES DEPARTMENT &
FORMERLY HON. PHYSICIAN
GOVT. STANLEY HOSPITAL, CHENNAI
EDITOR (INDIAN SUBCONTINENT)
JOURNAL OF THE SCIENCE OF HEALING OUTCOMES (JSO)

MISSION STATEMENT

A Research & referral Institute of Authentic Healing Sciences for Diabetes (both type 1 & type 2) and its major co-morbid conditions involving Heart & Vascular System, Brain and Nerves, Kidneys, Eyes, Digestive System, Obstetrics/Gynaecology etc. Ethical Research will be carried out on the whole-person Healing approach, based on Ancient medical wisdom of Ayurveda, the Modern Medical Science, and the emerging field of Energy-Medicine, based on the non-invasive highly effective principles of Pulsed Electro Magnetic Field Energy (PEMFE) systems (using Electromagnetic and other veritable sources of untapped natural energy) in human healing. This work will be carried out at the Centre in an open and transparent on-line Electronic Medical Record System, which is fully privacy-secured, and networked for scientific Analysis across the globe, ensuring International participation and documentation in Super peer-reviewed medical Journals. One such Journal “Journal of the Science of Healing outcomes’ will be part of this Project. The World Academy of Authentic Healing Sciences (WAAS) based at Mangalore, Karnataka State, India, and headed by the World-renowned medical Academic, Educationist and Cardiologist, Prof. B.M.Hegde will be collaborating closely with this project and also Head the visiting faculty of medical Luminaries. He will be the Dean of Innovative Research into Human Healing with particular emphasis on Inclusive Human Healing, cutting across the Spectrum of all barriers Viz. Economic, Colour, Caste, Creed, Race, Religion as well as boundaries – Local, national and International. In short it will be of an effort in **Innovative Human Healing sans barriers and Boundaries.**

This Project envisages a modest beginning, with a 45-bedded State of art unit, with 50% Free Service, as well as subsidized beds and private Deluxe Rooms for the convenience and benefit of all sections of the society, as envisaged by the VHS founder Dr.K.S. Sanjivi. The phase I of this project will be completed and is slated for inauguration in January 2010, and the full project by December 2010. This unique Research Centre with one-of-its kind infrastructure for Clinical Research in Human Healing, will be staffed by highly qualified and experienced academics, with unimpeachable ethical and clinical credentials and of established and acclaimed international standing, in the field of Medical Science, with top-end nursing and support staff.

It is out earnest hope that this **State of Art Dream Research Centre** would spur the world research in Diabetes and allied co-morbid conditions to heights and ethical levels hitherto unscaled, and help relieve the suffering of humanity at large and not just a small privileged, affordable section of the world community only. Our motto is as enunciated in the ancient Hindu Scriptures (Vedas). ‘Let all beings in the world be healthy and happy’!

लोका समस्ता सर्वजना सुकिनो भवतु!

Dr.C.V.Krishnaswami F.R.C.P(E),D.T.M & H(Edin),FAMS

TAG-VHS Diabetes Research Centre (VHS)

RESEARCH PROGRAMME PLAN

- (1) On-line EMR system to track efficacy, control, side-effects (ADR), and clinical well-being of persons with type 2 DM, under different treatment regimes – 2 year study (on-going 5 year project)
- (2) Comparison of the metabolic impact of Modern Medicine (and glycaemic-Index Diet) Vs. Ayurvedic approach (with Ayurvedic diet) in Mild to moderate, Nonketotic, NIDDM (type 2 DM) – 2 year study of recently detected cases (on-going 5 year study)
- (3) Metformin and Kidney Disease: Tracking the Renal parameters & clinical progress in persons with Type 2 DM with and without Metformin.

ENERGY MEDICINE RESEARCH

- (4) Pulsed Electro Magnetic Field Energy (PEMFE) Therapy and its applications in type 1 and type 2 DM: Long term (5 year) study using on-line EMR tracking system with periodic (yearly) Report of Analysed Data.
- (5) The usefulness of PEMFE in the absorption of S/c Insulin in type 1 DM & IRDM (type 2) – 2 year study.
- (6) The Role and Results of PEMFE in Ischaemic Heart Syndromes (CAD) in type 2 DM patients and controls (non-diabetics) – 2 year study.
- (7) The Role and Results of PEMFE in Cerebro Vascular Strokes, Dementias, Dysphasias, in type 2 DM patients and controls (non-diabetics) – 2 year study.
- (8) Diabetic Foot Ulcerations & Wound Healing in type 1 and type 2 diabetics: A comparison of Different modalities of treatment viz. Conventional, Pulsed Galvanic stimulation using Silverthera Socks and Pulsed Electro Magnetic Field Energy (PEMFE) therapies – 2 year study.
- (9) Relief of Neuropathic pain of different etiologies: Comparison of Conventional, Electrical (Silverthera, TENS), and Electro Magnetic (PEMFE) therapies – 2 year study.
- (10) Efficacy of PEMFE Therapy in acute painful abdomen, post operative abdomen and chronic digestive disorders – 2 year study.
- (11) The Application of PEMFE in gynaec conditions PCOS/PCOD, dysmenorrhoea, Uterine Fibroids and other gynaecological conditions – 2 year study
- (12) **PEMFE and the Eye**
 - a) PEMFE in diabetic macular oedema - Complimenting Photocoagulation.
 - b) PEMFE in Non-Proliferative Diabetic Retinopathy (NPDR – advanced), and Proliferative Diabetic Retinopathy (PDR) - Complimenting Photocoagulation.
 - c) PEMFE in Ischaemic Optic Nerve Syndromes (Papillopathy)
 - d) PEMFE therapy to prevent corneal rejection in Corneal transplants in type 2 DM
 - e) In Glaucoma
 - f) In Age related macular degeneration (AMD)
 - g) In Retinitis Pigmentosa (RP)
