Energy Medicine

Medicine of the future.

(Meta Medicine)
Prof. B. M. Hegde

- MD, FRCP(London), FRCP(Edinburgh), FRCP(Glasgow), FRCPI(Dublin), FACC (USA), FAMS.

- Former Visiting Professor of Cardiology, The Middlesex Hospital Medical School, University of London.

- Affiliate Professor of Human Health, Northern Colorado University, Greeley, USA.

- Former Vice Chancellor, Manipal University, Manipal, India.

- hegdebm@gmail.com
Why does the heart contract?

Teleologic view point!
Complicated problems have simple solutions.

- The smallest Particle holds the secrets of the universe.
- A small card fits in your entire savings.
- A small mosquito can mess up your peace of mind.
- A scorpion can be more venomous than a cobra.
- A small bullet can finish your existence.
- A small mistake can create a war - finish Life.
- The list could be endless. Don't ever consider anything, anybody small.
- Smaller it is - simpler it is.
Agenda for the talk.

- “Old order changeth yielding place to new lest one good custom shall corrupt the world!”
- What should be the future medicine like?
- What progress has been made in that direction?
- How good is the present medical system?
- Are there any alternatives to the present system?
- Conclusions.
Future Medical Care System

- Must be inexpensive.
- Authentic and scientifically proven.
- With minimal side effects.
- Judicious mix of many systems in the world.
- Emergency care from modern medicine.
- Most good to most people most of the time.
- Life style modifications included.
Energy Medicine
Physics of the human body
The body cell

Examples of Different Cells

- Epithelial Cell
- Muscle Cell
- Nerve Cell
- Connective Tissue Cell

??? Advaitha
Energy healing

- Diseases - recognised as energy imbalances in physics.
- Correcting that imbalance by:
  a) Life vessel treatment.
  b) Energy waters.
  c) Spiritual energy - Praanic healing
  d) Electromagnetic energy (PEMF)
  e) Electrical energy.
Dr. Glen Gordon’s PEMF
Dr. K. V. Shankar FRCS (England)

- Age: 72 years. First Patient tried. Study on going.
- In perpetual LVF for the last one year.
- Four heart attacks in the past.
- Was on 18 tablets daily.
- Getting admitted to ICU at least once a week at Isobel Hospital, Chennai.
- Doubting Thomases could contact:
  - Son-in-law. Prof. Mahesh Shankar PhD, Prof. University of Oxford at 0 988 433 9944 (Chennai)
Patient with the gadget on his chest.
Healing Power of Prayer

* American University Study’
* Intercessory Prayer.
* Faith in God.
AN EXTENSIVE LABORATORY STUDY OF PRANIC HEALING USING MEDICAL IMAGING AND LABORATORY METHODS

Joie P. Jones
University of California Irvine
OBJECTIVES

- Critically evaluate *Pranic Healing* in a laboratory setting

- Specifically: investigate possible mediation effects of *Pranic Healing* on HeLa cells in culture subjected to gamma radiation
EXPERIMENTAL MODEL USED TO EVALUATE PRANIC HEALING

- HeLa cells in culture subjected to gamma radiation
- Measure radiation survival rates with and without Pranic Healing
- Laboratory model is well established and well characterized
A SINGLE EXPERIMENT

- 10 identical petri dishes with HeLa cells in culture
- A1, A2: controls
- B1, B2: radiation only
- C1, C2: PH after radiation
- D1, D2: PH before radiation
- E1, E2: PH before and after radiation
OUR STUDY (1998 - 2006)

 520 experiments using 10 different Pranic Healers
 4 experiments using 4 groups of Pranic Healers (24, 32, 42, 38)
 100 experiments to test conditioning of laboratory space
 80 experiments using 3 Qigong Masters
 150 experiments using 8 individual “energy healers”
EXPERIMENTAL DESIGN

- Healers extensively interviewed at beginning of study
- Each experiment went forward only if healer felt confident
- Several healers found lab “dirty”; lab “etherically cleaned” during study
TYPICAL RESULT
(SURVIVAL RATE, 1 DAY POST RADIATION)

- A (control): ~ 100%
- B (radiation only): ~ 50%
- C (PH after rad): ~ 70+% 
- D (PH before rad): ~ 80+% 
- E (PH before and after rad): ~ 90+%
SUMMARY OF RESULTS

- Distance between cells and healer unimportant
- Shielding of cells from EMF and gamma radiation had no effect
- Experience of healer slightly important (but even beginning student could produce a result)
- Effect enhanced by group healing
- Healers failed to produce an effect in about 12% of the experiments
- Conditioning of lab space seems essential for success
- Findings are difficult to explain in terms of the standard scientific paradigm
IMPORTANCE OF CONDITIONED WORK SPACE

- Conditioned lab space (n = 520): no effect in 12% of experiments (62/520)
- Non-conditioned lab space (n = 50): no effect in 90% of experiments (45/50)
- “Very dirty” lab space (n = 50): no effect in 100% of experiments (50/50)
INVESTIGATIONS
OF THE 12% FAILURE RATE (1)

- Previous experiments: healer + cell manager
- New experiments (n = 100): healer + cell manager + observer
- Observer: made a donation to charity during treatment & willed any resulting good karma to be directed to the cells
INVESTIGATIONS OF THE 12% FAILURE RATE (2)

- Results
  - No improvement in cell survival rates
  - BUT failure rate dropped from 12% to 4%
  - No correlations between success rate and amount donated or charity used

- Represents first experimental observation and measurement of karmic intervention
ACUPUNCTURE & PRANIC HEALING
OUR INITIAL ACUPUNCTURE STUDY (1996 -1998)

- Correlation between specific brain cortices & corresponding acupoint stimulation
- Functional MRI
  - stimulation of visual cortex by light flashes
  - activation of brain cortices by stimulation of vision related acupoint
SUMMARY (1)

- PH can reverse the effects of radiation on cells in culture
- PH stimulation of vision related acupoint is identical to needle stimulation seen with fMRI
- Results are independent of shielding & of distance between healer and subject
- Results are dependent on conditioning of lab space
- Success improved by karmic intervention
World Academy of Authentic Healing Sciences.

Based in Mangalore, India. Subsidiary of the “Friends of Health,” USA.

**Founder President:**

Professor Rustum Roy  
Distinguished Professor of Material Sciences and Medicine,  
Penn. State University.

❖ To publish all authentic healing outcomes if they are well documented and pass through our “super-peer review” system.

❖ To encourage research into ancient Indian systems for their authentication.

❖ Needs your benevolence.

❖ No company advertisements accepted!

❖ Journal runs on philanthropy only.

The Science of Healing Outcomes
A journal

A super peer-reviewed publication devoted to research data and reports on the outcomes of healing interventions including single case studies.

Luke: before the LifeVessel treatment

Volume 1, Number 1
January 2008

Editor in Chief – B.M. Hegde
Co Editor in Chief – Rustum Roy
WHAT’S NEW ABOUT THE JOURNAL OF

The Science of Healing Outcomes

- 1st professional scientific journal devoted to records/data on human healing, including single case studies
- 1st peer-reviewed journal of case studies of healing using scientific criteria instead of statistical data
- 1st journal devoted to healing outcomes whether caused by body, mind or spirit vector
Water, the life giver
May the way that lies ahead be lit with sunny gleams
and prove to be the road to fulfilment on your dreams.

May it lead you to the place where lost hopes are restored,
where love is true and life is good and faith has its reward.

May the year ahead be the year for you.
Fig. 8 The enormous variety of structures of the molecules in which almost certainly the chemical entity H2O can exist. The well known H2O monomer with its precisely defined tetrahedral angle is shown on the top left and below it a series of dimers, trimers, tetramers which can be constructed on paper from the relatively rigid H2O molecule, and so on. Moderate sized molecules are on the right. See Chaplin 2004 (q.v.) for individual references for any particular structure pictured above.
